DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 2/16/07, with respect to the rejection(s) of claim(s) 1-10 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of newly found prior art.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 1. Claims 1, 9, and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Kuth et al. (5944663). Kuth et al. disclose a system and method for monitoring thermal treatment of a tissue regions of interest within a patient by obtaining x-ray images with image values corresponding with an array of spatial locations throughout the tissue region of interest (col. 2 lines 32-53). Kuth et al. teach monitoring temperature changes of a tissue region of interest by obtaining different set of x-ray images of the region of interest to note any changes (col. 4 lines 5-20 lines 45-57). Kuth et al. teach spatially displaying the thermal information for the array of spatial locations where the relative

Art Unit: 3737

magnitudes of temperature changes throughout the tissue region of interest are visually distinct (col. 4 lines 45 – col. 5 line 13).

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 2-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuth et al. in view of Badger et al. Kuth et al. teach displaying the temperature changes by using different symbols (col. 10 lines 58 col. 11 line 3) but do not teach using different colors to represent different relative magnitudes of temperature changes. Badger et al. teach amplifying a region of interest of the thermal information using different colors (col. 3 lines 27-33, col. 9 lines 13-60). The reference teaches display of multiple ranges of temperatures as a function of treatment time (col. 3 lines 34-53, fig. 5, 6). It would have therefore been obvious to one of ordinary skill in the art to use the teaching by Badger et al. to modify the teaching by Kuth et al. for the purpose of effectively analyzing changes in temperature in various tissue regions (col. 12 lines 49-52).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Baisakhi Roy whose telephone number is 571-272-7139. The examiner can normally be reached on M-F (7:30 a.m. - 4p.m.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian L. Casler can be reached on 571-272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
